

Monash Surgical Private Hospital

PARKING FACILITIES

Please note that we are aware of the parking constraints that our patients may experience at times.

The underground car park also serves the first floor suites in the facility, and at times all the car spaces may be taken quite early. Our busiest times are from 7am until 10.30am. More car spaces may be available after this time.

The following alternatives are suggested to ensure a smooth admission:

- Parking at the Clayton railway station (250 metres south of the facility).
- Parking at Monash Medical Centre Clayton (250 metres north of the facility on Clayton Road). A parking fee will apply.
- Street parking within the vicinity of the facility including Mary Street and Madeleine Street (observe the parking restrictions).
- Consider patient drop off at reception if partner / carer is not required during the admission process.

There is also an upper level car park. Two car spaces have been reserved in this area for patient collection and a car space is designated for disabled persons on the right side of the front drive.

Please allow extra time to accommodate your parking needs upon arrival at the facility on your day of surgery.
